

ControlTech Automation is a world-class electrical equipment manufacturer providing industrial control integration solutions for packaging, process, facilities, utilities, and other industrial applications.

Always striving to develop long-term partnerships with clients by offering quality, value and service above and beyond competitors, ControlTech Automation's degreed designers and highly skilled electrical technicians bring extensive experience to the design and implementation of control panel solutions for a wide range of industrial applications.

Exceptional People... Compelling Solutions

SERVICES

Design

*Schematic Development
Detailed Power and
Environmental Design
UL/CSA Adherence
ARC Flash Analysis/Mitigation
Back Panel Layouts and BOM
Development
Reverse Designs*

Project Management

*Project Specifications
Schedule Development and
Adherence
Parts Purchasing and Expediting
Detailed Design Review
FAT and Quality Control
Assurance Coordination*

Additional Services

*Custom Design or Build-to-Print
Manufacturing Capabilities
Customized Switchgear and
Motor Control Centers
Instrumentation/Pump Control
Panels and Skid Assemblies
Hazardous Location Control
Assemblies*

Industries Served

*Aerospace / Agriculture
Alternative Energy / Biotech
Brewery / Chemical / Steel
Consumer Products / Auditing
Entertainment / Serialization
Food and Beverage / Oil and Gas
Natural Gas / Pharmaceutical
Process Development
Water and wastewater*

ControlTech Automation specializes in the design, manufacture and certification of industrial control and power distribution panels, providing a complete integration process for packaging, process, facilities, utilities, and other industrial applications.

Operating independently from Barry-Wehmler, it maintains the financial stability and corporate support of the \$2.4 billion parent company.

Control Panel Design

ControlTech Automation maintains a 24-hour, three-shift operations consisting of designers and electrical technicians to expedite deliveries and meet client deadlines.

Each integration process is completed with specific operational goals in mind, and with intense focus on safety, accuracy, value, and reliability.

ControlTech Automation's design team provides factory acceptance test services based on customized FAT documents developed specifically for each application.

Control Panel Manufacturing

ControlTech Automation offers over 25 years of experience in providing quality control panel integration processes. Maintaining long standing partnerships with leading technology suppliers, ControlTech Automation offers technology solutions that best meet the needs of every client.

As one of the nation's largest manufacturers of electrical control solutions, ControlTech Automation offers high value control panels, short lead times, and exceptional quality.

World-class integration centers located in St. Louis, MO, and Atlanta, GA, are flexible to accommodate a wide range of projects, allowing decreased lead times and expedited deliveries while providing quality assurance for every product.

Certifications & Inspections

ControlTech Automation follows the latest NEC guidelines, in accordance with the following self-certifications:

- UL508A Domestic Control Assemblies
- UL698A Hazardous Location Applications
- CSA22.2 Shipments to Canada

International control panel declaration of conformity including: CE, ATEX, IECEx, CCC (China), and 4.v. Gost (Russia), is offered.

Project Management

ControlTech Automation engineers have an average of ten years product-support experience including design, time line, procurement, and quality management.

ControlTech Automation provides a single point of contact from the proposal development through final shipment.
