Design Group was founded in 1986 with a single office, a few technical professionals, and a compelling vision: to provide technical solutions to our clients, in a manner which was autonomous and independent from the Barry-Wehmiller equipment divisions.

Over the next three decades, Design Group steadily transformed its vision through careful thought and deliberate decisions. A healthy and vibrant business model has been created through diversity and balance within services provided and industries served.

Clients are provided with total operational solutions. Engineering services include conceptual planning of future initiatives, detailed engineering evaluations, project management, augmentation of the client's technical staff, and the design and construction of complete manufacturing facilities.

Today, Design Group serves a broad range of industries and market sectors including beverage, dairy, food, household and personal care, life sciences, chemical industry, energy, and utilities.

Design Group operates in over 35 offices located throughout the United States and Puerto Rico, focusing on delivering engineered solutions to the most challenging business needs.

With uncompromising respect to quality, confidentiality, and safety, Design Group focuses on developing long-term client relationships through proven execution.

Adapting to the frequent change throughout a project life cycle is a core strength of the firm as it provides maximum value for client investment.

Design Group strives to create an environment that enables each professional to return home each day with a true sense of fulfillment.

We are a firm that people enjoy working for, doing business with, and having as part of their communities.

Design Group is an independent and autonomous operating division within Barry-Wehmiller Companies, Inc., a leading supplier of engineering consulting and manufacturing technology across a broad spectrum of industries. With more than 11,000 team members across the globe in over 100 locations, Barry-Wehmiller has the potential to make the world a better place; one person, one job at a time.
