

DAIRY PACK RM90C CUP FILLER

The Dairy Pack RM90C is a cup fill-seal machine for dairy and food products, designed to run paper, plastic, glass, and aluminum with ease. Its integrated fillers are built for fast product change-over and support up to three different formats, covering volumes from 90g to 1,000g. With a speed range of 5,000 to 28,800 cups per hour, the RM90C delivers flexible, high-output performance for a wide variety of cup-filling applications.

WHY CHOOSE THE DAIRY PACK RM90C?

Features

High Operational Efficiency

High Cup and Product Flexibility

Gentle Product Handling

Plastic Cups (Stackable)

- Cup Platform: 55 to 125mm
- Cup Height: 40 to 150mm
- Product Example: Greek Yogurt

Paper Cups (Stackable)

- Cup Platform: 55 to 125mm
- Cup Height: 40 to 150mm
- Product Example: Coffee RTD

Glass Cups (Non-Stackable)

- Cup Platform: 55 to 95mm
- Cup Height: up to 120mm
- Product Example: Coffee Cream

Aluminum Cups (Stackable)

- Cup Platform: 55 to 125mm
- Cup Height: 40 to 150mm
- Product Example: Rice Pudding

DAIRY PACK RM90C CUP FILLER

Designed for high operational efficiency, the RM90C delivers production speeds up to 28,800 cups per hour with customizable operation up to 30 cycles per minute. It features a 14L x 4.5W x 3H m footprint, fills various formats from 90 to 1,000 g, and runs plastic, paper, glass, and aluminum materials. Offering high cup and product flexibility, it supports up to three different formats with the possibility of multi-layer products using up to three fillers, and machine stations can be added to fit your needs—including optional cup inserter, decontamination, filling stations, control stations, lid or overcap, and topper. It is designed for fast and efficient change-over, provides high accessibility for inspections, maintenance, and cleaning operations, and includes customizable HMI visualization for optimized production reporting.

Gentle product handling ensures suitability for most homogeneous and pumpable products with fruit particulates (10x10x10 mm, with larger products able to be studied), supported by BW Packaging's global commitment to hygienic operation, integrity, and accuracy of the filled products. Optional features include a filler device outside the filling area for ultra-clean hygiene and extractable filler heads for optimized safety in CIP, and fill testing is available for product optimization and to facilitate vertical startup.

Applications / Industries:

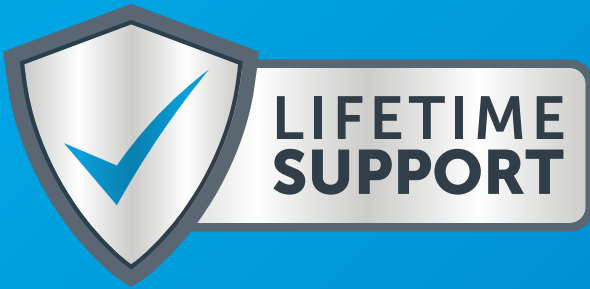

- ✓ Yogurt
- ✓ Desserts
- ✓ Spreadable Cheese
- ✓ Butter
- ✓ Flan
- ✓ Cream
- ✓ Dips
