DAIRY PACK DN60R INDEXED ROTARY FILLER

Compact and cost-effective, the Dairy Pack DN60R delivers production speeds up to 4,860 cups per hour with customizable operation up to 27 cycles per minute. Its 1.8W x 3.1H x 2.7L m footprint fits easily into constrained spaces while handling various formats from 90 to 500 g across plastic, paper, and aluminum materials.

Built for product flexibility, it supports fast format changes across all shapes and can be configured with added stations to fit your needs—including optional cup inserter, decontamination, filling stations, control stations, lid or over-cap, and topper. The design is conceived for fast, efficient cleaning, with high visibility on stations and tooling and high accessibility for inspections, maintenance, and cleaning operations.

Ongoing performance is supported by high-end aftermarket services: a global network of experienced, locally based technicians; aftermarket sites equipped with spare parts inventory; and an available test filler to optimize customer products and accelerate ramp-up.
