

DAIRY PACK DP80R BUCKET FILLER

The Dairy Pack DP80R is a bucket rotary fill-seal machine designed for dairy and food products, offering reliable performance across PS, PP, and PET materials. Its fillers are designed for up to two different formats and can accommodate volumes ranging from 1,000g to 5,500g, giving producers the flexibility to handle a wide range of bucket sizes. With a speed range of 720 to 1,400 buckets per hour, the DP80R provides an efficient, adaptable solution.

WHY CHOOSE THE DAIRY PACK DP80R?

Features

Specification Driven Design

Compact with Easy Access

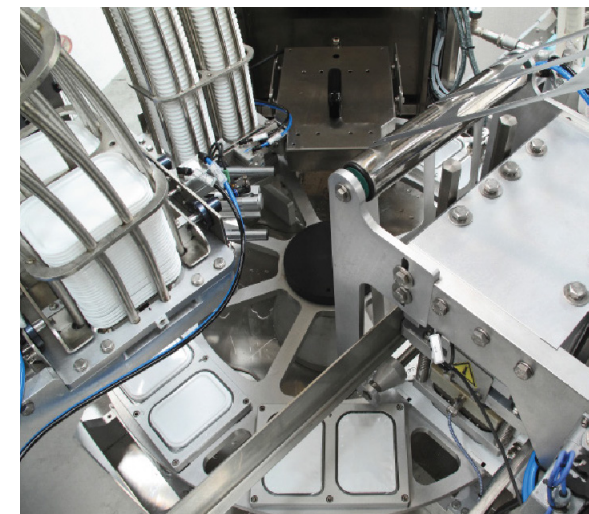

Gentle Product Handling

DAIRY PACK DP80R INDEXED BUCKET ROTARY FILLER

Designed with a specifications-driven approach, the DP80R delivers production speeds up to 1,400 cups per hour with customizable operation up to 23 cycles per minute. Its 2.4L x 1.9W x 2.6H m footprint supports various volumes from 1,000 to 5,500 g and runs circular and rectangular formats in PS, PP, and PET. Compact and easy to access, it accommodates up to two different formats and allows machine stations to be added as needed—including decontamination, filling stations, control stations, lid or overcap, and topper. It is designed for fast and efficient changeover, provides high accessibility for inspections, maintenance, and cleaning operations, and offers customizable HMI visualization for optimized production reporting.

Gentle product handling ensures suitability for most homogeneous and pumpable products with fruit particulates (5x5x5 mm, with larger products subject to study). BW Packaging offers a global commitment for hygienic operation, product integrity, and accuracy of the filled products, and fill testing is available for product optimization and to facilitate vertical startup.

Applications / Industries:

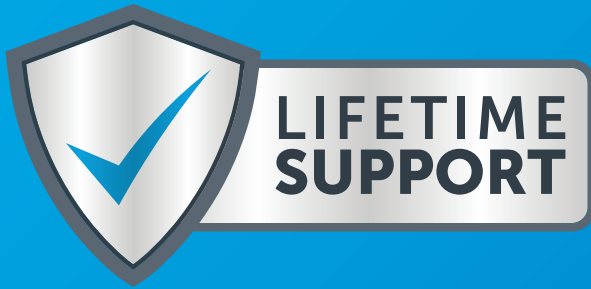

- ✓ Butter
- ✓ Yogurt
- ✓ Spreadable Cheese
- ✓ Cream
- ✓ Dressings
