

# DAIRY PACK RM12C CUP FILLER

The Dairy Pack RM12C is a cup fill-seal machine for dairy and food products, built to handle paper, plastic, glass, and aluminum with ease. Its integrated fillers are designed for fast product change-over and support up to three different formats, covering volumes from 90g to 1,000g. With speeds up to 43,200 cups per hour, the RM12C delivers high-output performance in a flexible, versatile design suited for a wide range of filling needs.

# WHY CHOOSE THE DAIRY PACK RM12C?

## Features

High Cup and Product Flexibility

Ergonomic Operation and Maintenance

Gentle Product Handling

Plastic Cups (Stackable)

- Cup Platform: 55 to 125mm
- Cup Height: 40 to 150mm
- Product Example: Greek Yogurt

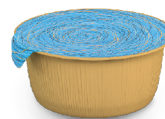

Paper Cups (Stackable)

- Cup Platform: 55 to 125mm
- Cup Height: 40 to 150mm
- Product Example: Stirred Yogurt

Glass Cups (Stackable)

- Cup Platform: 55 to 95mm
- Cup Height: up to 120mm
- Product Example: Sour Cream

Aluminum Cups (Stackable)

- Cup Platform: 55 to 125mm
- Cup Height: 40 to 150mm
- Product Example: Chocolate Dessert

## DAIRY PACK RM12C CUP FILLER

Designed for high cup and product flexibility, the RM12C supports up to three different formats with the possibility of multi-layer products using up to three fillers. It delivers production speeds up to 43,200 cups per hour with customizable operation up to 30 cycles per minute and features a 14L x 5.5W x 3H m footprint. The machine fills various formats from 90 to 1,000 g and runs plastic, paper, glass, and aluminum materials. Ergonomic operation and maintenance are supported through machine stations that can be added to fit your needs—such as optional cup inserter, decontamination, filling stations, control stations, lid or overcap, and topper—along with fast and efficient change-over, high visibility on stations and tooling, high accessibility for inspections, maintenance, and cleaning operations, and customizable HMI visualization for optimized production reporting.

Gentle product handling ensures suitability for most homogeneous and pumpable products with fruit particulates, backed by BW Packaging's global commitment for hygienic operation, product integrity, and accuracy of the filled products. Optional features include a filler device outside the filling area for ultra-clean hygiene and extractable filler heads for optimized safety in CIP, along with an available test filler for customer product optimization and faster ramp-up.

## Applications / Industries:

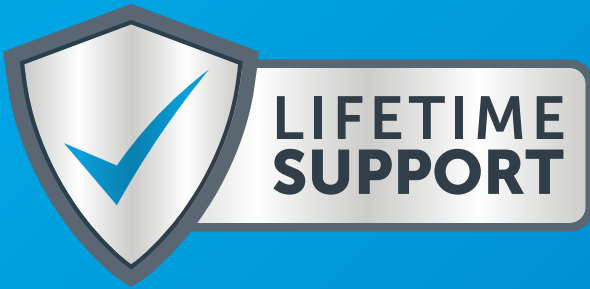

- ✓ Yogurt
- ✓ Desserts
- ✓ Spreadable Cheese
- ✓ Butter
- ✓ Flan
- ✓ Cream
- ✓ Dips
