# Accraply announces modular upgrade for Trine roll-fed labelers

## *Improved throughput, changeovers and maintenance among top benefits for Trine users*

*The Trine Modular Labeling Station is compatible with all existing and new Trine labeling systems.*

MINNEAPOLIS — Feb. 17, 2021 — Accraply, a worldwide leader in the design and manufacture of label application systems, has introduced the [Trine Modular Labeling Station](#), an upgrade for existing Trine roll-fed labelers that enables significant process improvements with minimal line disruption. Designed to integrate quickly and seamlessly with existing Trine labelers, this upgrade was engineered to improve throughput, simplify changeovers and operation, reduce maintenance costs and improve label appearance.

The Trine Modular Labeling Station can be retrofitted to an existing Trine labeling system or be used with a new Trine system. This solution was designed to satisfy the evolving requirements of Accraply's Trine customer base.

"This innovation is based exclusively on feedback from our customers who are already using Trine labeling systems," said Troy Peterson, Accraply's Trine product line leader. "We are excited to bring this modular and easy-to-install solution to the roll-fed label market."

To mitigate costs and line disruption, this upgrade leverages the customer's existing product handling system and existing Trine change parts. It can be installed in as few as three days, bringing the latest roll-fed labeling technology to the customer's operations quickly while minimizing downtime.

The labeling station includes [Accraply's SmartLink HMI](#), a next-generation controls platform with efficiency reporting, preventative maintenance alerts, self-diagnosing software, video tutorials and onboard parts ordering. This HMI simplifies operation and increases throughput. It also decreases setup time by eliminating variables and opportunities for operator error.

In addition, the Trine Modular Labeling Station includes improvements to maintenance, safety and waste reduction. The large diameter glue roll eliminates glue slinging and reduces vacuum drum cleaning time by 50 percent. The glue roller and glue scraper systems are safe, easy to keep clean and provide simple setup. The self-timing, servo-driven system includes fewer moving components and wear parts than previous Trine labelers, reducing the need for replacement parts and operator adjustment.

Accraply is one of several Barry-Wehmiller companies represented in [BW Packaging Systems](#), which brings together the collective packaging capabilities of Accraply, BW Flexible Systems, BW Integrated Systems, Pneumatic Scale Angelus and Synerlink.

### ABOUT ACCRAPLY

Comprised of the Accraply, Graham & Sleevit, Harland, Stanford and Trine brands, Accraply unites some of the most trusted names in product decoration and material converting. Known for our cutting-edge technology and innovative custom-engineered designs, Accraply has been credited with many industry firsts, and advances in application and converting technologies. Accraply, a Barry-Wehmiller Packaging Systems company, is a worldwide leader in the design, manufacture and support of pressure-sensitive (self-adhesive), roll-fed and shrink sleeve label application systems, as well as converting and finishing equipment, for the shrink sleeve and flexible-packaging markets. For more, go to [accraply.com](http://accraply.com).

### ABOUT BARRY-WEHMILLER

Barry-Wehmiller is a diversified global supplier of engineering consulting and manufacturing technology for the packaging, corrugating, sheeting and paper-converting industries. By blending people-centric leadership with disciplined operational strategies and purpose-driven growth, Barry-Wehmiller has become a \$3 billion organization with nearly 12,000 team members united by a common belief: to use the power of business to build a better world. CEO Bob Chapman shares the story of the company's transformation in his book, [Everybody Matters: The Extraordinary Power of Caring for Your People Like Family](#).
